Good game with awesome 8-bit colors. Recommended getting it!. It's an enjoyable game for a younger audience or in small doses. If you play it for hours you will get tired of it, because in the long run its gameplay gets repetitive – and that is Doodle God's biggest flaw.

7/10. 99c. why not. Running k-series tranny tuned on the civic is fast.. This game proves that 3D platformers are alive and well with interesting levels and music. However the kicking can be a bit delayed at times, though this does not affect my overall experience with the game. I hope that this game will continue to get better over time.. I love this game. Played it since I was young. I still do speed runs with it using my original game and a Mac OS 9 emulator. Hopefully version this will be less glitchy. Still would like a Mac compatible version through Steam though. For now, I guess we'll see how cleanly Windows 10 via Parallels runs it. Glad they put this one up.. So far this looks like an Early Access title, but released as a full game. I gave it two chances today (relatively short, looking at my play time), however at the end of the day I decided to get a refund.

There are games which look bad, but make this up with gameplay. Here, unfortunately, it was not the case for me. Mediocre models, bad animations, really not much fun. Not to mention, some of the options in game look like some debugging-era leftovers, which were never changed into something more user-friendly (switching graphical settings with +V-? seriously? I have to take off my headset to switch graphical options in the game?). I tried to force myself and play the game further, but couldn't. This game needs lots of polish before being worth 15 EUR (not to mention, without the discount it is worth 20 EUR).

The concept is kinda cool, the execution is bad. The game feels incomplete and looks like it was quickly done to catch up with new VR market. Maybe I'll go back to it if developers decide to update and evolve it into a better product. In my opinion, right now it is not worth the money.

Although I must admit, reload mechanic on the Rifle was kinda cool.. Completed it mate.

. I like it alot, Im always looking for this kind of games since tekken card tournament.

It has comentary and some decent graphics and a good range of different kind of customazations. Hats, sneakers, glasses, bandanas and some other stuff to unlock, the jackets look the best, you can make a new char for 20k\$ what is not so crazy much, maybe 3 fights or trainings.

The first half hour I didn't get you attacking 1 round and defending 1 round. I first was searching for my defence card to play, but you have a defence deck and an attack deck for each round. If you play head card and he plays a headcard too than its a defence.

For this price fore sure its good, it could be 10 bucks and nobody would complain.

there are some small things ofc what could be improved like the KO or TKO moment could be abit more fluent, or that when you are in the training and go to deck it would be nice to go back to training and not to the main menu or to search cards by name maybe. Or for me the biggest, why I cant fight others in multiplayer.

But to be honest if was really fun once you understand that you have a deck for each round, and take away old cards with the less energy but with equal or more power or defence to get better. I made first an more obvious choice with bxoing and kickboxing and later made a mu thai wrestling mix, what I like cause of the defence.

The feeling was of everything was almost like.... let's get ready to rumble!

Fun game

An interesting game. Each playthrough is different. It frustrated the hell out of me at times, yet I still enjoyed playing it. The soundtrack is lovely.. Lovely game, with nice aesthetics. It's pretty short (which may be good or bad for you), and it's not exactly groundbreaking, but world would be nicer with more Wunderdoktor.. I totally enjoyed this game, it plays really well. You can control the boy with a mouse as I did or you can use a controller if you'd prefer, either way it plays well, but I prefer a mouse and keyboard with this game. This Adventure game is fairly short which I like, as it does not drag on like other games can. KU is quite easy to play there are not alot of enemys coming at you, so if you dont like difficult games then this is a good game for you. The handdrawn artwork is very nice and unique. Also there are some fighting Arenas that open up at the end, so you can test your skills out there. My advise would be look at some youtube videos of the game, as thats what helped me make my choice to buy this game and see what you think of it. I have no regrets buying this game, I feel it was worth it, although quite short To the DEVELOPERS, this is a very nice game in my opinion, It does play really well now. I hope there are more chapters coming to this nice game, as I'd like to see more to this story about KU ;) Keep up the fantastic work you are all doing and THANK YOU. :). Another one of those 'match 3 colors' games. In this one you have to guide a stream across the colored blocks using arrows which you can turn using your mouse. It's ok I guess, it entertained me enough to write a little review about it. If you can get it cheap, it's worth a try.

[Rating: 71/100]. Quite the surprise!

Although the game lacks some polish (texts, balance, pace...) the game is deep enough for a few hours of mind struggling. For myself, kind of a fan of 4x and merchant strategy, the game has some good mechanics. No need for spreadsheets. There are very few different commodities whose prices changes every turn. That forces you to redo your trade routes again and again, at least until you get the mechanics of investments. Also you cannot spend an infinite amount of money each turn (diminishing returns, remember?) so after a while you don't need to trade anymore. That's a good thing.

The combat mechanics are a bit complex and very shallowly explained. But once you get the hold on it is interesting. I've been just reloading savegames to test combat strategies. And only tried one race.

I guess the game can easily provide beyond 20 hours of solo entertainment for a fan of the genre. Hopefully that helps you if you consider buying the game.. I was willing to give this game a try. I love tower defense games and thought thats what this was going to be like.... Not so much.

Now i realize the game is in early access so ill try to not be to critical, But i just dont see this getting any better.

This took me like 5 reloads to try to understand what the hell to do, Before i could figure anything out i would get killed and have to reload yet again.

The game is just boring, Take it off EA and let it cook a bit longer or all your going to end up with is a crap load of negative reviews.. Very enjoyable gameplay and beautiful story. The only downside is the combat turned a little boring towards the end. Recommend!

. Pretty fun game not worth 25 euro's but 10 euro's would be fine
